The cumulative grade point average is determined by multiplying the grade points for each course attempted at Western New England University by the number of credit hours of the course and totaling the results for each course to arrive at a grade point total; this total divided by the number of credit hours in all courses attempted will give the cumulative grade point average.

Any course in which a grade of less than C or 2.00 was received may be repeated at any time during the student's university career. The grade point average is computed on the basis of the most recent earned grade in each course. The symbol, #, indicates a repeated course. Credit for the course is awarded only once.
